Computer Science graduate from RMIT University with hands-on experience in ERP consulting and front-end development. I enjoy working with people, analysing problems and finding practical solutions, and I'm used to working with clients, developers and operations teams to understand issues and support technology projects. I'm most interested in roles where technology, people and business problems overlap.

EXPERIENCE

Junior Consultant
December 2025 – July 2026

Portcities (formerly M+ Software), Melbourne

- Worked closely with developers, operations staff and clients to investigate and resolve issues, translate client requests into clear, actionable tasks for the development team and keep project activities on track.
- Maintained project records, documentation and system updates across multiple projects.
- Prepared weekly reports and project documentation to track progress against timelines, flag issues early and keep clients and internal stakeholders informed across different teams, countries and time zones.
- Assisted with day-to-day project administration, client communication, record keeping and follow-up tasks.

Front-End Developer Intern
November 2025

M+ Software, Melbourne

- Built and styled front-end components for Kiakoe, an internal product initiative.
- Worked alongside senior developers in an existing codebase, quickly picking up new tools, development processes and coding standards through tickets, code review and day-to-day collaboration with the team.
- Tested and debugged UI components across different screen sizes and devices, identifying layout, styling and usability issues and correcting them so features worked consistently before being reviewed and finalised.
- The internship led to an opportunity to continue with the company as a Junior ERP Consultant.

Sales Assistant
January – July 2025

Typo, Docklands

- Helped customers in store and over the phone, answering enquiries, understanding their needs and recommending suitable products, while providing friendly, attentive service in a busy retail environment.
- Processed transactions accurately while managing customer requests during busy trading periods.
- Kept merchandise, displays and stock areas organised and well maintained.
- Worked closely with the team to handle customer enquiries, share tasks during busy trading periods, support store presentation and keep day-to-day store operations running smoothly and efficiently.

Inventory Assistant
July 2023 – November 2024

Blossom Costumes, Thomastown

- Recorded and checked daily stock movements, identifying and correcting inventory discrepancies to keep stock records accurate, up to date and reliable for order fulfilment and day-to-day warehouse operations.
- Prepared, labelled and dispatched customer orders, handling more than 100 orders during busy periods.
- Received incoming deliveries, checked items against records and inspected product quality.
- Kept stock areas organised and supported the day-to-day running of the warehouse.

EDUCATION

Bachelor of Computer Science
2022 – 2025

RMIT University, Melbourne
